Product C

1. What type of corn product is this? Make a guess, then your teacher will tell you.

   Our guess: Corn Oil  The Answer: ___________

2. How does your product look similar to a kernel of corn?

3. What could you do to the corn kernels to make them look more like your product?
   What part(s)? List.

   1) The outer part of the kernel's color. (Yellow)

4. Do you think the whole corn kernel was used to make your product or only part of the kernel?

   Only the germ contains oil so only the germ was used.

5. Is your product similar to any other food product? If it is, does this help you think about how your product was made?

   Yes, this also looks like olive oil, which would also be made by an olive's germ.
