Product B

1. What type of corn product is this? Make a guess, then your teacher will tell you.
   Our guess: gelatin. The answer: corn syrup.

2. How does your product look similar to a kernel of corn?
   It doesn't.

3. What could you do to the corn kernels to make them look more like your product?
   What part(s)? List.
   Let it dissolve and melt them into a clear substance.

4. Do you think the whole corn kernel was used to make your product or only part of the kernel?
   Part: the oil inside the germ.

5. Is your product similar to any other food product? If it is, does this help you think about how your product was made?
   I don't think it's an accurate answer. But maybe a think oil to make it clear.
